RE: Review: No Parking on Front Lawns City Ordinance

Per the requirements enacted by the City Council in regard to the ordinance noted above, the Board of Directors of The Stonewall Community Association, Inc. has reviewed the benefits provided to our neighborhood and determined that it should remain in force and effect. The Board has not found there to be any significant opposition to the protections provided by the ordinance. There have been a limited number of violations and these have been addressed in a prompt manner.

The following are the most visible benefits of the ordinance:

- Limits the amount of erosion on front lawns;
- Helps to maintain a pleasant aesthetic in the neighborhood;
- Allows flexibility of enforcement for homeowners who may be moving or hosting an event.

There are two improvements that the Board has identified for consideration:

1. Providing CityLink staff with information regarding this ordinance and its applicability to the Stonewall subdivision. In the past there has been a moderate degree of difficulty when reporting violations of the ordinance through the CityLink system.
2. We would also ask that the City Council consider increasing the review periods from every two years to a 5-year review period at minimum. We would not be opposed to a permanent designation.
