Thanks Steve! After a brief scan, it looks great. I'll look at it in more detail when I settle down in my office.

As far as the neighborhood outreach is concerned. I physically went door to door met with all adjacent property owners and neighbors on April 25, 2024. I explained the project in detail and answered all questions. There was no one that was in opposition to the project, and all interested parties seemed to be excited about the development opportunity.
