

## **NC HUNTERS FOR THE HUNGRY**

The goal of NC Hunters For the Hungry is to utilize an overabundant natural resource to meet the needs of communities in which we live.

- The way it works: hunters legally harvest deer from an overabundant population, meat processors produce high protein deer burger, and food distribution networks distribute the meat to people who are in need.
- They use tax deductible financial donations provided by corporations , organizations, and individuals to reimburse meat processors for their expense of producing the deer burger.
- The program processes 35,000-40,000 pounds of venison for the hungry each season.
- There are 20 deer processors across the state that are involved in the program.
- The program is happy to accept hunter-harvested deer at the Guilford County location.
