Dear all

Regard: Letter of Simmel August 25, 2017

We firmly oppose replacing stormwater management pond with bank with two drive through lanes. This plan ignore Winston-Salem environment protection and neighbor citizens' interests. The stormwater management pond is very much needed.

Current development of Silas Creek Park and Fairlawn has already created severe water run-off, land erosion and flood in the old town road neighborhood. Developers has not made adequate efforts to correct current situation. Adding additional bank will certainly make situation worse.

We were very glad that City of Winston-Salem and developer had a meeting with us on September 6, 2017 and heard our concerns.

We are looking forward to a site visit and correction plan from developers and City of Winston-Salem.

Sincerely

Xiaoxue and Min

Subject: Sonnyoll Tract 8

Sirs:

Thank you for agreeing to meet with us yesterday and for hearing our concerns. I am, of course, still concerned about all the development that is impacting our community in negative and disturbing ways.

Seeing the plans that included a retirement community east of the most recent construction--the plans that will destroy more trees and habitat for animals and, no doubt, will cause more water run-off--may have been the most distressing part of our meeting for me. It looks like there is to be no end to it. But I understand that we have different definitions of progress.

Please thank the contractors for their suggestion that they will work to make the current ponds more effective. I will look forward to that. Every little bit helps.

Thank you, Keith, for working with Mim.

I realize that everyone is working within the limits of the law. I just want to remind you that the decisions you make do make a difference.
Please remember us.

Yours,
Rebecca Brown
